

Bio-Detox

Pitch 2:

Therapist: Christine Bucklar

Release toxins from your body and feel the benefit of this gentle treatment

Christine specialises in Reiki healing and Aqua Detox, an extremely pleasant treatment designed to detox and re-balance the body. It involves immersing the feet in tepid water for 30 minutes. A metal coil, known as an Array, is added to the water, and a micro-current is passed through it, creating a flow of electrons that converts the water into the same Bio-Energetic field as the person using the machine.

There are 2,000 pores on the bottom of each foot, and using the machine allows the positive and negative ions to travel through the body, which in turn sets up a vibration that releases any harmful toxins through the pores of the feet.

The water changes to various colours according to the nature of the toxins released, and those pioneering Aqua Detox claim that pictures taken using a GDV camera, which is able to identify the body's Bio-Energetic Field, show the disruption and un-balanced condition of the person before treatment, and the resulting balancing of the energetic field after Aqua Detox treatment.
